Phone: (+213) 674576556 (Mobile) **Email address:** ghernaoutmissipsa.pro@gmail.com **LinkedIn:** www.linkedin.com/in/missipsa-ghernaout **GitHub:** www.github.com/missipsag

Address: Ouzaid et Frères, 121, 15019, Tigzirt, Algeria (Home)

EDUCATION & TRAINING

Master's Degree in Intelligent Computer Systems

University Mouloud Mammeri Tizi Ouzou [01/09/2025 - Current]

City: Tizi Ouzou | **Country:** Algeria

Level in EQF: 7

Coursework : Advanced Algorithms and Complexity, Intelligent Networks, Cybersecurity, Big Data, NLP, Advanced Databases, Systems Programming, Problem Solving, Deep Learning and Neural Networks, Data Mining.

Bachelor's Degree in Computer Systems

University Mouloud Mammeri Tizi Ouzou [01/09/2022 - 15/06/2025]

City: Tizi Ouzou | **Country:** Algeria

Level in EQF: 6

Coursework : Algorithms and Data Structures, Artificial Intelligence, Discrete Math, Algebra, Statistics/Probability, Networks, Databases, Compiler Design, Operating Systems, Computer Security, Software Engineering.

PROJECTS

Unitime Flutter | Spring Boot | PostgreSQL | Frontend Source Code | Backend Source Code

- Architected a cross-platform solution using Flutter (MVVM) and Spring Boot 3 (Clean Architecture), ensuring a strict separation of concerns and high system maintainability.
- Implemented advanced design patterns including Command for reactive state tracking, Result Union for type-safe error handling.
- Optimized data integrity and performance through DTOs and a normalized PostgreSQL schema, secured by role-based JWT authentication and platform-specific secure storage.

Handwritten Digit Recognition Scikit-learn | Matplotlib | NumPy | Source code

- Engineered an end-to-end ML pipeline using SVM (Support Vector Machine) and PIL/NumPy to process/recognize digits with 98% accuracy.
- Developed an interactive Tkinter GUI featuring real-time 8x8 pixel normalization and intelligent cropping.

Lexical Analyzer C | Compiler Design | Source code

- Engineered a low-level scanner in C based on Deterministic Finite Automata (DFA) to tokenize source code.
- Optimized system performance through manual memory management and efficient buffer handling.

YelpCamp Platform Node.js | Express.js | MongoDB | Source code

- Engineered a RESTful MVC platform using Node.js and MongoDB, integrating Cloudinary and Passport.js.
- Implemented middleware-level security and flexible NoSQL data modeling for complex CRUD operations.

SKILLS

AI & Data Science

Python (NumPy, Pandas, NLTK, Matplotlib, sklearn, TensorFlow) | Apache Hadoop (HDFS, Map/Reduce etc) | Apache Spark | NoSQL (HBase)

Software Development

Self-taught Flutter mobile app development | JAVA (Spring Framework, SpringBoot, REST, Hibernate, JPA, JDBC, JAX-RS, Maven, Gradle) | JavaScript | Node.js | Express.js | C | MySQL | MongoDB | PostgreSQL

OS & Tools

Linux | Windows | Version Control (Git) | Postman (API testing)

LANGUAGE SKILLS

Mother tongue(s): Arabic

English

LISTENING: C1 **READING:** C1 **WRITING:** C1
SPOKEN PRODUCTION: C1
SPOKEN INTERACTION: C1

French

LISTENING: C2 **READING:** C2 **WRITING:** C1
SPOKEN PRODUCTION: C2
SPOKEN INTERACTION: C2
